

Show & \$ell

{product id=2130}

This male 2018 Amel corn snake is possibly het for Scaleless Striped Caramel (therefore, het Scaleless Striped Butter). He is 16" long, eating frozen/thawed pinky mice. \$65.00 plus \$39.00

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless), AND even possible-hets are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake-aka: Great Plains Ratsnake. Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids.
