

## Show & \$ell

{product id=1944}

This 25" male 2017 AMELanistic corn snake is currently eating frozen/thawed hopper mice. His parents were both het for Scaleless, so perhaps that's why his color zones are so saturated and free of stippling? His \$175.00 price includes note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless) are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids.
