

Show & \$ell

{product id=1378}

This 2015 18" female Amel Tessera is currently eating unaltered frozen/thawed pinky mice. The yellow that's most obvious in the front part of her body has only recently been intensifying and spreading tail-ward. She should have amazing yellows mixed with her orange when fully mature. Her \$285.00 USD price includes

Same snake in different pose.
