{product id=1686}

This 13" 2017 female Amel Tessera is about a month old, eating frozen/thawed 1-DAY-old pinky mice. Both parents are het for the Scaleless gene mutation so he is 66.6% possibly-het for Scaleless AND the sire is a Butter, so toDAY's Amel Tessera is het for Caramel (therefore, Butter). His \$265.00 price includes
