

Show & \$ell

{product id=1004}

This 2013 female Buf is 36" long, eating frozen/thawed hopper mice. The inherent value of Buf mutants is that their mutation is dominant to wild-type, so no waiting two generations to get target product. She was brumated from November 20, 2014, to March 10, 2015, so she will be receptive to a male very soon. Her \$295.00 price includes
