{product id=1691}

NOPE, this is not a CREAMSICLE. This 22" male 2016 Amel Buf Okeetee Corn snake (produced by Catherine Turley) is currently eating frozen/thawed small or medium pinky mice. He is het for Motley or Stripe (maybe both) and 50% pos-het (possibly het) for Hypo. Of course, the greatest value asset of this snake-beyond Creamsicle appearance without using inter-species hybridization-is the genetic reality that what gives this snake its orange and yellow colors is the dominant-to-wild-type gene mutation, BUF. His \$245.00 price includes
