This 2014 female aberrant *Buf Tessera* corn snake has a lot to offer corn snake breeders. Because both of her obvious mutations (*Buf* and *Tessera*) are dominant to wild- type, both can be demonstrated in the first generation of breeding this snake to another. No waiting two generations to see target product. Her \$425.00 price includes She is also 50% possibly het *Amel*. She also demonstrates a high volume of black around many of her markings, which could render the look of an Extreme *Tessera* at full maturity.
