{product id=1925}

This 2017 female Buttermint corn snake is now 23" long, eating frozen/thawed large pinky mice. Most of the Buttermints I've produced had half the yellow intensity of this one, so she should have obvious markings with lacy contrast, as an adult. All of the other Buttermints we've produced barely showed any color at all when mature. Her \$225.00 USD includes **SOLD**
