

SOLD

Adult female Charcoal Cornsnake Het Amel and Bloodred (therefore, Het White-out). Her \$200.00 price includes *SOLD*

She is currently 50" long, eating frozen/thawed adult mice. She hatched in 2007, but is still a great producer for me. She was brumated from September 22nd, to January 18th, so she will be ready to breed in a few weeks-after a heavy feeding schedule of one adult mouse every three to four DAYS. SMR# 1020.
