2008 female Coral Snow Corn. She is 44" long, eating frozen/thawed adult mice. She is a great breeder and has made many beautiful Coral and Salmon Snows for me over the years, BUT she is MEAN. She has never bitten me, but that's not because she didn't try. Also, none of her babies were ever mean while I had them, but I'm selling her because I'm tired of her being so ungrateful for all the yummy mice I feed her. I easily estimate that she has another four or more years of fertile reproduction. Because she's such a monster toward humans her price of \$300.00 USD includes FREE SHIPPING Her low price is due to her incongenial attitude toward humans.
