This 18" female 2018 Creamsicle het for Caramel and Motley. She is currently eating frozen/thawed large pinky mice.
\$95.00 plus \$39.00

note: ALL Creamsicle corns in the hobby toDAY, AND even hets and possible-hets are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Creamsicle corns (and their siblings and relatives—albino-or-other) are inter-species hybrids.
