

## Show & \$ell

{product id=1591}

This 2015 male Diffused corn is currently 26" long, eating frozen/thawed fuzzy mice. He also demonstrates the Masque mutation, but falls short of being called a Bloodred. One of his parents was a Fire (Amel Bloodred) so he's at least het Amel? His \$165.00 usd price includes **SOLD**

Same snake in different pose.

Belly pic demonstrating an ALMOST-Bloodred phenotype, but when I see this much black on the ventral keel (where Belly meets sides), I'm inclined not to call it a Bloodred.
