

## Show & Sell

{product id=2135}

This 28" male 2017 corn snake is het for Amel and possibly het for Caramel and Scaleless. He is currently eating frozen/thawed large fuzzy mice. While not the most colorful of corns this snake is about to slough its skin, so it should have a little more color in a week or so? \$215.00 plus \$39.00

**note:** ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless), AND even possible-hets are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled relatives) are inter-species hybrids.
