This 36" 2013 male "Okeetee" is from the pairing of a Huddleston Reverse Okeetee to a Tessera, so in typical collateral Tessera fashion, he demonstrates extreme coloring, AND is het for at least Amel. He is currently eating frozen/thawed small adult mice. He brumated from October 20, 2014 to February 20, 2015. His \$195.00 price includes _
