If you like Hybrid corns, this one is a bonus. The parents of this 14" male 2017 corn snake are an Extreme Sunkissed Okeetee (from Ultramel parentage) and a Creamsicle, so two non-corn snake species are in his family tree; Emory's Ratsnake and Gray Ratsnake. The macro head shot demonstrates what seems to be color in the iris that matches surrounding facial markings?? Comically, the eye stripe-adjunct to a matching facial stripe-was a great genetic idea, but not for such a pale mutant as this one. It would have been more logically successful on a darker snake. He is currently eating frozen/thawed pinky mice. His \$145.00 USD price includes
