{product id=2111}

This 2018 male High-white Reverse Okeetee corn snake is now 13" long and currently eating frozen/thawed pinky mice. A blush of orange in ground zones between markings will detract from him maturing to be a TEN on the 1-10 scale for this morph, BUT the white dirty-white blotch margins you see now, will be white when this snake is mature. These are very wide blotch margins for any Okeetee type. \$115.00 plus \$39.00
