

Show & \$ell

This 21" long 2013 male Western Hognose Snake is currently eating frozen/thawed fuzzy mice. Since both parents were het for Albino, he is possibly het for Albino. His \$125.00 price includes ALL Western Hognose snakes (*Heterodon nasicus*) have rear maxillary fangs that CAN delivery a mild venom. Many bites from Western Hogs result in bleeding, and isolated swelling much like the result of bee and wasp stings.
