

## Show & \$ell

{product id=924}

2013 female Lava corn snake, het for Terrazzo. She is currently 36" long, eating frozen/thawed adult mice. Her \$295.00 usd price includes overnight delivery. If not for the few spinal kinks on her tail, she would be much more expensive. There is no historical precedence to suspect that the spinal kinks will have any impact on her ability to reproduce.
