Produced by Catherine Turley, this 2016 female Lava Lavender is possibly also RedCoat? She is now 16" long, eating frozen/thawed pinky mice. She has several spinal kinks (minor ones on the tail and a severe dorsal kink about mid-body (blue arrow pointing in second pic). I don't guarantee that those are the only spinal kinks on her. Her \$125.00 USD price includes [Extra Pic](#)
