

Show & \$ell

{product id=1953}

This 2017 male Anery Tessera is currently 27" long, eating frozen/thawed hopper mice. He is het for Sunkissed and either Ultra OR Amel (see **PROJECT** details below). His \$225.00 USD price includes

Sunkissed Ultra/Ultramel Anery Tessera PROJECT

Father is a Sunkissed Anery and Mother is an Ultramel Anery Tessera so the double-mutant Anery Tessera progeny of this pairing are het for Sunkissed and either Ultra **OR AMEL**. I italicized **OR AMEL** because IF the mother of this year's progeny is an Ultra Anery all of the babies from this pairing will be het for Ultra and Sunkissed. If-as labeled on her cage-the

mother (pic'd below) is an Ultramel Anery Tessera, half of the progeny will inherit one copy of Amel and the other half will inherit one copy of Ultra, BUT there is no way to distinguish between them.

FATHER of the 2017 Anery Tessera mutant being offered:

MOTHER of the 2017 Anery Tessera mutant being offered:
