Miami Striped Motley

Female

d.o.h. 2009

52" long on March 23, 2013

\$300.00 shipped

This 2009 female Miami Striped Motley is now eating frozen/thawed adult mice and loves to be handled. She is 52" long and has been a great breeder for South Mountain Reptiles. I no longer have a male to pair her with so she's off to a new home. She brumated from December 15th, 2012 to March 5th, 2013 so she's ready to breed now.
