Still learning my limitations, I guess I don't need three of these males so this RedFactor (RF) Snow Tessera corn snake is for sale. He only has one of the paired gene copies of the Red Factor mutation, but some of his progeny will inherit the gene. If you breed this male to any Red Factor mutants, some of the progeny will be homozygotes (possessing both of the paired gene copies) and therefore, much redder than this male? He is 33" long, eating frozen/thawed weaned mice. His \$265.00 price includes
