#112412

Salmon Anery Motley

Female

d.o.h. 2010

36" long on November 23, 2012

\$325.00 shipped

Comments: Superior color and size maturity.

This 36" long female Salmon Anery Motley is the product of pairing a Salmon Anery Motley to a Salmon Snow Motley. She should, therefore, be a Strawberry Anery Motley, and of course, she is Het for Amel. Judging from other products of such a pairing, she should develop more of the Coral overtone she exhibits now.
