{product id=2129}

This 28" male 2017 Scaleless corn snake should be mature enough to breed this summer? He is currently eating frozen/thawed large fuzzy mice. \$525.00 plus \$39.00

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless), AND even possible-hets are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids.
