

Show & \$ell

{product id=1252}

Around the end of October, we will be able to ship this beautiful 2015 female Scaleless corn snake (she hatched early in October). By that time, she will have fed at least twice in a row, and will therefore be declared a stable feeder of small frozen/thawed pinky mice. Her parents were het for P/S Bloodred, Sunglow, Motley and Scaleless so she has the potential to be heterozygous for one/some/all of those gene mutations. Her \$895.00 price includes ALL Scaleless corns in the hobby toDAY derive from the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake) and are therefore technically inter-species hybrids. Thank you, Jud McClanahan in Salina, Kansas, for making this remarkably beautiful corn snake.
