

## Show & Sell

{product id=2213}

This 14" female 2019 Scaleless Butter corn snake is currently eating frozen/thawed newborn pinky mice. \$1150.00 plus \$39.00 Ps, the zones that look orange now will turn bright yellow when this snake is mature. None of the orange seen toDAY will be there later.

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless) are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids. . . .
