{product id=1916}

This 2018 Scaleless female corn snake is now 13" long, eating frozen/thawed small pinky mice. The seemingly glowing orange is surely inherited from her grandfather, a Super Sunglow Motley (so dubbed SUPER for having both of the paired gene copies of the Red Factor mutation)? Her \$595.00 USD includes

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless) are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids.
