

While genetics will always render each organism distinctive from all others of its species, the general look of this hatchling Anery Scaleless corn snake is common in our bloodlines.

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless) are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake) and are therefore technically inter-species hybrids
