

This male 2017 Sunkissed corn snake is possibly het for Scaleless, since both parents were het for Scaleless. He is currently 22" long, eating frozen/thawed fuzzy mice.

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless) are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids.
