

Tessera from a Coral Snow Motley parent

Female

d.o.h. 2010

24" long on January 19, 2013

This 28" long female Tessera is from the pairing of a Tessera to a Coral Snow. Therefore, this female is het for Amel + Anery = Snow, Motley, and possibly the Red Mask Mutation (if the respective red-type mutation this one possesses is recessive to wild-type).
