

Show & Tell

This photograph features a sub-adult Cherry Amel corn with two 2016 hatchlings. F1 out-crossed hatchling on the left is an out-cross between a Cherry Amel and a Banded Fluorescent. The hatchling on the right is from a Cherry Amel x Okeetee, het Amel. Both hatchlings in this image will be much brighter red in a year, and by their second b'DAYS they should be as red-or redder-than this sub-adult.
