Amel - from Red Mask mutant parent

Female

d.o.h. 2010

40" long on Feb. 15, 2013

\$175.00 shipped

Comments: Superior color and fresh out of brumation

This 40" female Amel is from a Red Mask mutant parent so she should carry the Red Factor gene mutation. She was brumated from October 10, 2012 to January 31, 2013 so she is eating every five DAYS and should be ready for breeding in a few weeks. She is very friendly and has never attempted to bite.
