toDAY's SNAKE of the DAY (Thu. Feb. 21, 2013)

Details

#022113
Snow Corn Snake
Female
d.o.h. 2005

45" long on Feb. 21, 2013

\$400.00 shipped

This 2008 female Snow corn has rather rare yellow markings. I bred the original F2 Tessera to her so that two generations later the Snow Tesseras would have more visible pattern. She hides no other traits that I'm aware. She was brumated from October 10, 2012 to January 31, 2013 so she will soon be ready to breed. Last year she laid 21 eggs in her first 2012 clutch and 14 on her second clutch so she is quite the breeding machine.
