Tessera

Male

d.o.h. 2009

45" long on Mar. 1, 2013

\$475.00 Shipped

This 2009 male Tessera is now 48" long, eating frozen/thawed adult mice. He has spawned some of the most dramatically contrasting (black pattern borders) Tesseras we've seen. He has a great demeanor and tolerance for human interaction. He could be a prosperous breeder for someone looking for a 2013 breeder. He was brumated from October 10, 2012 to January 31, 2013.
