

## Show & Tell

Three Terrazzos that hatched on Feb. 26, 2019 (two Terrazzos, Het Charcoal and one Charcoal Terrazzo). The original ancestry of this mutation compound was a Pewter bred to a Boyd-line Terrazzo. The one facing the camera exhibits a Masque head pattern, so this was inherited from the PEWTER patriarch of this Boyd-line Terrazzo line. The debris stuck to the snakes is particulate vermiculite from their incubation medium.
