

\$OLD

This 2012 female Amel is 43" long, eating frozen/thawed adult mice. She is from a "pet" project of mine years ago producing high yellow Amels from the pairing of Sunglow Motleys to Butters. Hence, this one is het for Caramel (therefore, Butter) and Motley. She brumated from mid-November, 2014 to mid-February, 2015 so she is almost ready (if not NOW ready) to wed? Her \$275.00 price includes **FREE OVERNIGHT SHIPPING** \$OLD
