

## Show & \$ell

{product id=1639}

This 20" male 2016 RedCoat Lavender corn snake was produced by Catherine Turley. He is 50% pos-het for Anery, and one of his parents had Strawberry in its family tree. Yes, you see a "zaggy" kinked tail, but it's relegated to the part of the tail that would not hinder reproduction. Via sight and palpation I could not feel any other kinks or deformities in the spine, but I stop short of guaranteeing there aren't any. His \$335.00 price includes
