

Show & Tell

I haven't put a male with this female Ultramel Motley in several years, but decided to this year. I bred her to a Butter Motley Het Sunkissed (therefore, het Honey) because the parents of toDAY's SOTD feature were a Gold Dust Motley and a Striped Amel Het Charcoal (therefore, het Blizzard). In 60 DAYS we'll at least have some Gold Dusts and perhaps a few other morph compounds.
