

## Show & Tell

This essentially feature-less Scaleless Striped Butter hatched on March 29th. Its striped pattern will become more prominent through maturity.

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless), AND even possible-hets are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake).

Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids. S . . .
