Details

#040313

Buckskin Okeetee

Female

d.o.h. 2011

35" long on April 2, 2013

\$175.00 shipped

Comments: She brumated from December 15th, 2012 to March 16, 2013 and is now eating frozen/thawed small hopper mice.

Buckskin Okeetees are the result of selective breeding toward the obvious tan ground colors that accentuate the red markings. They should have prominent thick, black blotch margins.
