

## Show & Tell

These two sibling Scaleless corn snake mutants hatched on March 29th. They will be listed for sale in a few weeks, after 3-5 consecutive feedings of unaltered frozen/thawed DAY-old pinky mice.

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless), AND even possible-hets are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake).

Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids. S . . .
