Salmon Snow Motley

Male

d.o.h. 2011

32" long on April 9, 2013

**\$250.00 shipped**

Comments: Superior color and size maturity. It's difficult to photographically capture his true colors. His Corals and Pinks are deeper than this picture shows (at least on MY computer monitor) and his greens are much prettier in person. Since no two monitors render colors the same anyway, perhaps the true colors of this beauty will be expressed better on other monitors. He is 32" long, the product of pairing a Salmon Snow Motley to a normal corn that is heterozygous for Salmon Snow Motley. Judging from other snakes from such a pairing, he should develop more of the Coral overtones and green accents he now exhibits.
