

This 31" female 2017 corn snake is possibly het for Scaleless, since both parents were het for Scaleless.

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless) are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids.
