

This 2018 FEMALE Butter corn snake is currently 20" long, eating frozen/thawed large pinky mice. Her parents were both het Scaleless, so she is possibly het for Scaleless.

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless), AND even possible-hets are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids.
