

The *Snake of the Day* headliner of this web site features photographs that we believe will interest our web site visitors. Each daily photograph will be posted at 11:00 am. central (GMT - 5) and replaced in 24 hours. Feel free to make *suggestions* regarding what snake photographs you would like to see in this daily feature. The animals pictured here are not for sale, unless otherwise noted, but you can find available surplus snakes for sale on the *Surplus Page* of this web site. We appreciate your patronage and welcome any *suggestions* you may have.

Naturally, the name of this morph (Pied-sided Bloodred) denotes its best photographic angle. Therefore, it's not easy to show you how much white is on the sides of this female, but she is a strong HIGH-expression example of her morph. Her eggs will hatch mid-June and we'll be shipping her 2013 progeny by early July. The variable nature of this mutation results in this many hatchlings having a considerable range of white expression from LOW to HIGH, and every degree between.
