

The *Snake of the Day* headliner of this web site features photographs that we believe will interest our web site visitors. Each daily photograph will be posted at 11:00 am. central (GMT - 5) and replaced in 24 hours. Feel free to make *suggestions* regarding what snake photographs you would like to see in this daily feature. The animals pictured here are not for sale, unless otherwise noted, but you can find available surplus snakes for sale on the *Surplus Page* of this web site. We appreciate your patronage and welcome any *suggestions* you may have.

The eggs of this Banded Fluorescent Corn Snake female were sired by a Banded Fluorescent male with the same color scheme, but unlike her, his ground color more closely matches the red of his saddles. Both have shocking white blotch margins, so hatchlings should mature to be the same. Hatchlings will be available for shipping in June.
