

## Show & Tell

2014 Pewter Tessera (Charcoal Bloodred Tessera). Some say Pewters are actually *Diffused Charcoals* (VS *Charcoal Bloodreds*), but all of ours have deeply-red Bloodred ancestors. This controversy (Bloodred vs Diffused) is apparently based on appearance. If they look red, they call the Diffused corns Bloodred, but if they don't have predominant red, they call them Diffused. The distinction is silly, and begs confusion.
