

This 14" female 2019 Scaleless Reverse Okeetee corn snake is currently eating frozen/thawed newborn pinky mice. Pic 2 toDAY is a 2017 female from the same parents, now owned by Scott Menefee. Thanks for letting me use your pic, Scott.

note: ALL Scaleless corns in the hobby toDAY (including SCALED corns that are carriers of the Scale-less mutation-aka Het Scaleless) are descendants of the original pairing of a Corn Snake to an Emory's Ratsnake (aka: Great Plains Ratsnake). Therefore, all Scaleless corns (and their scaled siblings) are inter-species hybrids. . . .
