

## Show & Tell

Circa 2013, a small adult Palmetto (left) and a newly hatched Palmetto (right). The bubble inset shows—more closely—the egg tooth that had not yet fallen off. No, we don't breed Palmettos any more, but Travis Whisler Reptiles—who purchased our entire Palmetto inventory—is already cooking lots of 2018 eggs. Travis Whisler Reptiles on FaceBook or email him at [TWReptiles@aol.com](mailto:TWReptiles@aol.com), for availability and prices.
