

## Show & Tell

2014 Lava Terrazzo corn hatchlings. We've often been asked if the pink eyes mean they are Albino (Amel)? No way! These are not only NOT AMEL, but they are not even Het for Amel. The red eyes are apparently the ocular culmination of the two mutations; Terrazzo and Lava. No, the Tessera is not related. I had two clutches of eggs in this incubation box; Tesseras and Lava Terrazzos.
